## Academic Projects

### ❖ Major Project :

**Bhopal 1Click** – Frontend and Backend Development

**Tech Stack :** HTML, CSS, JavaScript, Thymeleaf, Spring Boot, JPA & Hibernate, Rest API, MySQL

#### Description:

“Bhopal 1Click” is a smart city web application that centralizes essential information about Bhopal. Designed for citizens, government officials, and analysts, it offers structured data on education, infrastructure, energy, traffic, public safety, and waste management. The platform presents real-time updates in a tabular format for easy navigation and decision-making. It enhances governance through transparency, helping authorities improve urban planning. With features like transport details, healthcare insights, and business data, Bhopal 1Click promotes a data-driven approach to city management. Scalable and user-friendly, it supports sustainable urban development and seamless information access for a smarter, more connected Bhopal.

### ❖ Minor Project :

**Examinaut** – Frontend and Backend Development

**Tech Stack :** HTML, CSS, Javascript, Bootstrap, Java, JSP, Servlet, MySQL, JDBC

#### Description:

Examinaut is a comprehensive web-based platform designed to facilitate online examinations and interactive quizzes, specifically tailored for academic institutions, corporate organizations, and IT professionals. The project aims to bridge the gap between traditional assessment methods and modern digital requirements by providing a secure, scalable, and user-friendly environment for conducting various types of evaluations.
